

MANAN MALUKA

Software Developer | Python Developer

Ahmedabad, Gujarat | +91 9033887588 | mananmaluka01@gmail.com

GitHub: github.com/manan0101 | LinkedIn: [Manan Maluka](#)

PROFESSIONAL SUMMARY

Motivated MCA student with a strong foundation in Python, SQL, IoT, and data science. Experienced in leading hackathon teams, building full-stack and embedded projects, and using modern AI-assisted development workflows. Seeking Software Developer, Python Developer, or AI/ML Internship opportunities to contribute, learn, and grow.

TECHNICAL SKILLS

- Programming: Python, SQL, C, C++,
- Data: Data Science, Machine Learning Fundamentals, Data Analysis
- Web: HTML5, CSS3, Bootstrap
- Databases: MySQL, MongoDB (Basic)
- Developer Tools: Git, GitHub, VS Code, Arduino IDE
- AI Development Tools: Cursor, GitHub Copilot, ChatGPT

EXPERIENCE

Applied AI Intern | CSRBOX Foundation × AICTE × IBM SkillsBuild (Dec 2025 – Jan 2026)

- Completed a 6-week internship focused on applied AI concepts and industry-oriented learning.
- Explored AI-assisted software development, prompt engineering, and practical AI workflows.
- Collaborated on guided assignments and strengthened problem-solving skills.

Front-end Web Development Intern | CSRBOX Foundation × IBM SkillsBuild (Jun 2024 – Aug 2024)

- Completed a 6-week internship covering front-end web development fundamentals.
- Built responsive interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Improved understanding of UI design, responsiveness, and debugging.

PROJECTS

MindPulse – AI-Powered Mental Health Prediction System

- Developed an end-to-end machine learning web application using **Python, FastAPI, Scikit-learn, Pandas, NumPy, HTML, CSS, and JavaScript** to predict mental health outcomes from user inputs.
- Performed **data cleaning, exploratory data analysis (EDA), feature engineering, categorical encoding, outlier handling, and model training** using regression algorithms with hyperparameter tuning and evaluation metrics.
- Built and deployed a REST API with **FastAPI**, integrated the trained model into a responsive frontend, and deployed the application on **Render** using Git and GitHub.

PII-Sanitizer Detect (Hackathon Team Leader)

- Led a team in designing and developing an AI-powered application to detect and sanitize Personally Identifiable Information (PII) from text, enhancing data privacy.
- Integrated NLP techniques to identify sensitive information such as names, email addresses, phone numbers, and identification numbers.

- Coordinated project planning, task distribution, and final presentation during the hackathon while ensuring timely delivery.

Vanish – Privacy-Focused Chat Application

- Developing a privacy-focused real-time chat application using Flutter, Dart, Node.js, Socket.IO and Firebase as part of a college mini project.
- Implementing core features such as real-time messaging, secure user authentication, chat rooms, and a responsive cross-platform user interface.
- Focusing on scalable backend architecture and privacy-oriented communication while gaining hands-on experience with full-stack mobile application development.

Smart Door Lock & Alert System (1st Prize Winner)

- Developed an IoT-based smart security system using **Arduino Uno, RFID, GSM, Keypad, Servo Motor, and I2C LCD** for secure door access.
- Implemented multi-factor authentication with RFID cards and password verification, along with real-time SMS alerts for unauthorized access attempts.
- Achieved **1st Prize** at the college exhibition by demonstrating a reliable and cost-effective smart home security solution.

EDUCATION

Master of Computer Applications (MCA) | GLS University | Semester 3

Bachelor of Computer Applications (BCA) | Shree Swaminarayan College of Computer Science | M.K. Bhavnagar University

ACHIEVEMENTS & CERTIFICATIONS

- First Prize – Flash 2K24 Project Exhibition for Smart Door Lock & Alert System.
- Team Leader – Hack2Skill Hackathon at Nirma University.
- Completed two industry-oriented internships with CSRBOX and IBM SkillsBuild.
